### Phase - 1

#### MICRODERMOLIFT

*Accelerating the revitalization processes*

Improve skin tone and prepare it for the next step with a delicate exfoliation action, insuring skin's natural oxidation and rejuvenation.

### Phase - 2

#### LIGHT DIODE PORATION

*Reduction in volume of adipose tissue*

Exclusive patent!  
UNIQUE and EFFECTIVE ALTERNATIVE to SURGICAL LIPOSUCTION, allows to significantly and irreversibly decrease the volume of adipose tissue.  
MULTIPOLAR LASERPORATION acts directly and incisively in an extraordinary short time and without any side effects.

#### ENDORADIOMAG

*Softening and Defibrotozing tissues*

Exclusive patent! INTENSE FOUR MOTION skin STIMULATION  
Cutting edge result of scientific studies, - 360° range of action on any kind of body's beauty flaw.  
Unique rotating nozzle enhances the effectiveness and impact of the procedure.

### Phase - 3

### Phase - 4

#### RADIOPORATION SQUARE TECH

*Restore Tone and Firmness of tissues*

The new Radioporation Square-Tec® head combines 4 electrodes that irradiate EP and Multipolar RF in asynchronous and sequential activity which stimulate, reactivate, and rehabilitate the tissues in depth.  
Restore tone, firmness and compactness to the superficial and deep tissues.

#### ENDO FACE

*Immediate Lifting effect*

A dedicated Radio lift multipolar hand piece is specially designed to create the maximal energy concentration exactly where it is necessary, in order to act on the most difficult to reach areas. It efficiently decreases wrinkles, while adding skin tone and providing the much needed lifting effect, making skin younger and firmer

### Phase - 5
